Copyright © tutorialspoint.com

Description

The method **min** returns the elements from the *list* with minimum value.

Syntax

Following is the syntax for **min** method:

```
min(list)
```

Parameters

- **list** -- This is a list from which min valued element to be returned.

Return Value

This method returns the elements from the list with minimum value.

Example

The following example shows the usage of min method.

```
#!/usr/bin/python  
  
list1, list2 = [123, 'xyz', 'zara', 'abc'], [456, 700, 200]  
  
print "min value element : ", min(list1)  
print "min value element : ", min(list2)
```

When we run above program, it produces following result –

```
min value element : 123  
min value element : 200
```
