۴	<p>Reading</p> <p>متن زیر را بخوانید و به سوالات به صورت خواسته شده پاسخ دهید.</p> <p>There are many languages in the world some of which may seem harder to learn for second or foreign learners. But which is the most difficult language to learn? Well, it's not easy to reply because there are many factors to discuss. A native speaker of French, for example, will find English easier to learn than a native speaker of Chinese, for instance, because English is very similar to French, while Chinese is very different, so first Language can affect learning a second language. The greater the differences between the second language and the first, the harder it will be to learn. Many people answer that Chinese is the hardest language to learn, possibly influenced by the thought of learning the Chinese writing system, and the pronunciation of Chinese appears to be very difficult for many foreign learners. However, for Japanese speakers, who already use Chinese letters in their own language, learning writing will be less difficult than for speakers of languages using the Roman alphabet. Teachers and the conditions in which the language is learned also play an important role, as well as each learner's motivation for learning. If people learn a language because they need to use it for a living, they often learn it faster than people studying a language that has no direct use in their day to day life.</p> <p>Choose the best choice.</p> <p>29. The word "it" in line 6 refers to</p> <p>a) learning first language b) second language c) difference of languages d) Chinese language</p> <p>30. ۴	<p>The research for new sources of energy has led into various ways. To produce any type of energy, the resources of the earth are used. The main resources of the earth are fossil fuels such as natural gas, oil and coal. Electricity is generated from coal, oil and natural gas, but the process has proven to be expensive.</p> <p>Experimental works are started to produce energy by other resources. Scientists and experts spared no pains to search for new ways of producing energies. For instance, electricity has been produced with giant wind turbines. Not only changing unwanted products to gas or oil is a cheap way to produce energy, but also it is an effective way to get rid of waste.</p> <p>Some experts expect service companies to expand hydroelectric power generated from streams and rivers. As an example, 50 years ago hydroelectric power provided one third of the electricity used in the United States but today it includes only 4%. The oceans are another possible source of energy. Scientists are studying ways to change the energy of oceans' tides and waves into electricity. ۴	<p>متن زیر را بخوانید و به سوالات داده شده هر قسمت پاسخ دهید.</p> <p>Cell phones are one of the world's greatest inventions. They keep us in touch with friends and family and can be life savers in an emergency. Although they can be found everywhere, they are still new to society and people should learn suitable behavior when they use them. Here are some suggestions for using the cell phones politely.</p> <p>Your phone doesn't have to be on all the time and you don't always have to answer it immediately. Avoid taking calls or texting when you are engaged in a face-to-face conversation. During the time that you are attending an important business meeting, or in a party with friends and family, try to hide your mobile. Placing your phone on the table or desk sends the clear message that they are not so important for you. Texting or talking on the phone during a formal business meeting is highly unacceptable and rude. It is polite and responsible to turn off your cell phone or put it on silence before meetings, meals, and meaningful moments. If you can't turn your device off, turn it to silent or vibrate. If you have an important job, for example you are a doctor or nurse, or waiting for an emergency call, first apologize the others, then leave the room or walk at least 10 steps away and talk quietly. It shows that you know how to use your cell phone properly.</p> <p>True / False</p> <p>41. These days, most people know how to use their phone in a polite way. a) True b) False</p> <p>42.
