۴	<p>Reading</p> <p>متن زیر را بخوانید و به سوالات داده شده هر قسمت پاسخ دهید.</p> <p>For many environmentalists, the world seems to be getting worse; they have developed long lists of our main fears. Natural resources are running out, the population is growing; leaving less food to eat, animals and plants are becoming extinct in great numbers and the planet's air and water are becoming ever more polluted.</p> <p>But a quick look at the facts shows a different picture. According to the book "<i>the limits to Growth</i>" which was published in 1972 by a group of scientists, energy and other natural resources have become more than they were in the past. More food is now produced per each person of the world's population than any time in history. Fewer people are dying of hunger. Although animals and plants are becoming extinct, only about 0.7% of them are expected to disappear in the next 50 years, not 25-50%, which has been predicted. And finally, most forms of environmental population appear to have been increased.</p> <ul style="list-style-type: none"> • Read the questions and choose the best choice. <p>37. The main idea of this passage is....</p> <p>a) a number of animals and plants are becoming extinct</p> <p>b) animals and plants extinction are happening at very high speed</p> <p>c) an increase in most forms of environmental population</p> <p>d) extinction is happening at a much higher rate, not the number that people think</p> <p>38. The scientists who wrote the book "The limits to Growth" believed that energy and other natural resources.....</p> <p>a) are endless</p> <p>b) would soon be used</p> <p>c) are more than they were in the past</p> <p>d) disappear quickly</p> <ul style="list-style-type: none"> • True/ False <p>39. According to environmentalists, energy and natural resources are not disappearing.</p> <p>a) True b) False</p> <p>40. Scientists believe that animals and plants are becoming extinct at lower rate.</p> <p>a) True b) False</p> <ul style="list-style-type: none"> • Answer the following questions. <p>41. What do environmentalists think about the world?</p> <p>42. What do the scientists believe about energy and natural resources?</p>	۱۱

۴	<p style="text-align: right;">متن زیر را بخوانید و به سوالات داده شده هر قسمت پاسخ دهید.</p> <p>Everyone knows that when a child is born, he cannot speak. Making a few kinds of sound like crying is the only way he can communicate with others. By crying, he means he is hungry or he is tired. In this way he can show his feelings, but after a few months, the baby gets aware of his world. At this time, he's careful about everything around him, especially his parents. He begins to record what they do, what they say and how they act. He even records his parents' accent, tone of voice, or gesture.</p> <p>Then the baby starts to act like them, that is he tries to copy them. By acting like his parents, he'll be able to say his first words which are very simple. As he grows up, the child's speaking ability improves, and when he gets older, he can choose proper words, and expressions to say exactly what he wants.</p> <p>• Read the questions and choose the best choice.</p> <p>43. The only way of communication for a newborn baby is</p> <p>a. his facial expressions b. crying c. saying difficult words d. gestures</p> <p>44. The word "act" is closest in meaning to</p> <p>a. remind b. copy c. change d. respect</p> <p>• True / False</p> <p>45. The first child's words are very simple. a) True b) False</p> <p>46. Parents' gestures are also difficult to practice. a) True b) False</p> <p>• Answer the following questions.</p> <p>47. How can a baby show his feelings?</p> <p>48.
