AES / Rijndael

Table of Contents

- AES / Rijndael
- Usage
- See Also

Chris Veness has ported his JavaScript AES implementation to  PHP code. I wrapped the whole thing into a class for easier use.

Download it here:  [aes.class.phps](#) (14.54 KiB, [723 downloads](#))

Usage

```
<?php
require_once('aes.class.php');

$text = 'Hello, world!';
$password = 'itsmysecret';
$blocksize = 256; // can be 128, 192 or 256

$scripted = AES::encrypt( $text, $password, $blocksize );
// do something ...
$decrypted = AES::decrypt( $scripted, $password, $blocksize );
?>
```
