Vocabulary

A: Your teacher wants you match the pictures with sentences. How do you do that? (One is extra) (2 points)

1. Two heads are better than one.
2. They use huge solar panels for windows to receive sunlight all day.
3. The spring tides rise upwards of 30 ft.
4. Let your computer monitor go to sleep.
5. This is the ideal way to convert waste into energy.

B: Help Zahra to fill in the blanks using the words given. (There is one extra word) (3 points)

radiation – plugged – dreading – absorbed – replace – consume – stove

1. Only 27% of paper weis recycled.
2. I've got an interview tomorrow and I'm it.
3. Water and salts are into our blood stream.
4. The new design will eventuallyall existing models.
5. An accident at the power station could results in large amounts of being released.
6. Is your printer working? Wait a minute. It`s not in.

C: Zahra`s teacher has asked her to write the missing words down in the sentence below. (2/5 points)

1. She fell of theb..... and may have broken her ankle.
2. Trees canl..... the cooling costs of your home.
3. Too many cooksS..... the broth.
4. The ...d.....for organic food is increasing these days.
5. You can write your notes on a ...S.....page.

D: Zahra wants to find the exact meaning of each word. Help her to do so. (2 points)

A

1. A **variety** of techniques were used.
2. The **economy** of our country is not well.
3. A fuel-efficient car uses **gasoline**.
4. All the shirts were **reduced** to 10\$.
5. Nothing lasts **forever**.
6. Exercise provides many **benefits** for your health.

B

- a. a liquid used for producing power in the engines of cars.
- b. all the time or every time.
- c. many different types of things or people.
- d. to cause positive results.
- e. the careful use of money, time, goods, etc.
- f. smaller in size, amount or price.

E: Zahra tries to find an explanation for each **proverb**. Help her to do so. (2 points)

A

1. The early bird catches the worm.
2. Out of sight, out of mind.
3. Birds of a feather flock together.
4. Actions speak louder than words.

B

- a. This proverb means people spend time with others who are similar to them.
- b. This proverb means you should wake up and start work early if you want to succeed.
- c. This proverb means just saying you'll do something doesn't mean much, actually doing it is harder and more meaningful.
- d. This proverb means you soon forget people or things that are no longer visible.

F: Zahra chose the correct answer to each item very fast. Do you think what the correct answer to each item is? (2 points)

1. They agreed to with Brazil on a program to protect the rain forests.
a. review b. cooperate c. burn d. achieve
2. To stop the global warming we have to use energies like solar and wind.
a. alternative b. available c. kinetic d. chemical
3. She worries a lot about her weight, but she can't her weakness, for fast food.
a. comprehend b. arrange c. divide d. overcome
4. He wrote his comments in the of the composition.
a. outlet b. margin c. gadget d. symbol

Reading comprehension

Read the following text about “energy” and then answer the questions. (4 points)

Passage 1:

The research for new sources of energy has led into various ways. To produce any type of energy, the resources of the earth are used. The main resources of the earth are **fossil fuels** such as natural gas, oil and coal. Electricity is generated from coal, oil and natural gas, but the process has been proven to be expensive.

Experimental works are in progress to produce energy from other resources. Scientists and experts spared no pains to search for new ways of producing new source of energy. For instance, electricity has been produced with giant wind turbines. **Geothermal power** or the heat from the earth is also being tested to produce energy. Many societies are burning rubbish and other biological waste products to generate electricity. Not only changing unwanted products to gas or oil is a cheap way to produce energy, but also it is an effective way to get rid of waste.

Some experts expect service companies to expand **hydroelectric power** generated from streams and rivers. As an example, 50 years ago hydroelectric power provided one-third of the electricity used in the United States, but today it includes only 4%. The oceans are another possible source of energy. Scientists are studying ways to change the energy of oceans' tides and waves into electricity. Experiments are also underway to make use of temperature differences in ocean water to produce energy.

Clean energy resources are vastly respected, valued, and used all over the world to keep the environment clean. As a result, scientists try to introduce new types of energy resources called clean energy resources to nations of the world.

Read the questions and choose the best choice.

1. Which is **the best title** for this passage?
 - a) The use of waste products for energy
 - b) The search for new sources of energy
 - c) Effective ways of producing hydropower
 - d) New discoveries in geothermal power

2. Which of the following is **NOT** offered in the passage as a source of energy?
a) electrical power b) clean energy c) nuclear energy d) hydroelectric power

True / False

3. Changing waste products to gas or oil is an expensive way to generate energy, but it is very effective.
a) True b) False
4. Geothermal power is the heat from the Earth. a) True b) False

Answer the following questions.

5. What is hydroelectric power produced from?
6. What will happen if the nations of the world use clean sources of energy?

Cloze test

Read following passage and then fill in the blanks with correct choices. (2/5 points)

Global warming is having huge effects on the Earth's atmosphere, the weather, and the world climates. At least that's the **...(1)...** of many researchers and scientists. What is global warming? It's a slow **...(2)...** in the average yearly temperature of the planet. But why does this happen and who **...(3)...** it? The answer is clear: the human being; he's the only one who's responsible for disturbing the balance of nature. His car adds many gases to the air, his house is built where trees and plants **...(4)...**, and his factory**...(5)...** the rivers and kills many animals and fish.
