

They say real martyrs dont die they multiply From the battlefield of Karbala The principles we apply
The holy month of Muharram We beat our chests and cry Cause the leader of Paradise Stood alone
with no water supply Protecting the Sunnah against the most evil guy Thats why today we defy Every
arrogant power Who make it apparent they only seek to apply Their robotic system To try and make
us hypnotic victims To close our eyes and listen to a maniac mission Of course well never abide We
plug into your matrix Simply to just leave your whole mainframe fried Our a apex is an arrangement
Around our dear Guide For you it should be blatant No matter how many you kill Well never subside
Death is our pride It keeps us alive Deep inside our heart resides A love and his blood will never dry
Labayka Ya Hussein you hear that? It means, kiss world domination good-bye You may be a super
power Still pebble to the Most High Serving the devil, Zionism the number 1 ally You tap our phones,
in our centers You plant spies But theyre so insignificant like two dead flies You think killing our
leaders Will weaken our faith You create ten million believers For every one you take Plus their
spirits survive Every martyr is awake Alive teaching us to sacrifice for Allahs sake My friend take a
stride forward Against this bored world Filled with more war The enemys army is on our border 1979
we established Islamic order Therefore you assassinate Our scholars in building corridors Keep your
dirty dollars you horror supporters Youre doomed to Hell, but Allah is the judge Your hands are
covered in blood In our lands you hover in planes full of Bombs with our names, you drop Pain on a
young tot In his pops brain you shot A hot bullet that shocked An entire generation that have never
forgot Your illegal occupation Demonic reign you brought We see beyond it On a plain where our
heroes have fought Hussain(as) is so near though Freedom fighters see him a lot Martyrdom is how
we maintain Against your evil plot Cause the righteous people Youve slain have a heart beat You can
never stop
