Foreword

Preface to the second edition

Preface to the first edition

Acknowledgements

## **SECTION 1. Complete Dentures**

### 1. Introduction

Introduction

Effects of ageing

Complete dentures

## 2. Diagnosis and treatment planning

Diagnosis

Treatment planning

## 3. Mouth preparation

Introduction

Sequelae of wearing complete dentures

Mouth preparation

## 4. Impressions and casts

Introduction

Definitions

Principles and objectives of impression making

Classification of impressions

Impression materials

Anatomic and denture landmarks

Preliminary impressions

Preliminary/primary cast

Custom trays

Final impressions

Definitive (final) cast

## 5. Record bases and occlusal rims

Introduction

Definitions

Record bases

Occlusal rims

Clinical contouring of occlusal rims

## 6. Maxillomandibular relations

Introduction

Definitions

Structure of TMJ

Mandibular movements

Maxillomandibular relations and records

## 7. Articulation

Introduction

Definitions

Articulators

Articulation

## 8. Occlusion

Introduction

Difference between natural and complete denture occlusion

Requirements of complete denture occlusion

Types of complete denture occlusion

## 9. Selection of artificial teeth

Introduction

Objectives

Selection of anterior teeth

Selection of posterior teeth

Selection of material

Posterior tooth forms

## 10. Teeth arrangement

Introduction

Factors influencing teeth arrangement

## 11. Try-in

Introduction

Evaluation of mandibular trial denture

Evaluation of maxillary trial denture

Evaluating both dentures together

## 12. Processing and remounting

Definitions

Waxing

Flasking

Dewaxing

Packing

Curing (polymerization)

Deflasking

Remounting

Selective grinding or occlusal reshaping

Recovering denture from the cast

Finishing

Polishing

### 13. Denture insertion

Introduction

Denture inspection

Denture insertion

Instructions to patient

Recall and maintenance

Denture adhesives

### 14. Postinsertion problems

Introduction

Looseness

Discomfort

Poor appearance

Miscellaneous

### 15. Refitting and repair

Refitting

Repair

## 16. Single complete denture

Introduction

Maxillary single complete denture

Mandibular single complete denture

Combination syndrome

## 17. Immediate dentures

Introduction

Definition and types

Conventional immediate denture

Interim immediate dentures

Comparison of conventional and interim immediate dentures

# **SECTION 2. Removable Partial Dentures**

## 18. Introduction

Introduction

Definitions

Indications and contraindications

Steps in fabrication of a clasp-retained cast removable partial denture

Component parts of removable partial denture

## 19. Sequelae of partial edentulism

Introduction

Sequelae of partial edentulism

## 20. Classification of partially edentulous arches

Introduction

Need for classification

Requirements of classification

Classification systems

## 21. Component parts

Minor connectors

Rests and rest seats

Direct retainers

Indirect retainers

Denture base

## 22. Diagnosis and treatment planning

Introduction

History

Examination

Diagnostic impressions and casts

Differential diagnosis

Treatment planning

## 23. Surveying

Introduction

Definitions

Surveyor

Surveying

## 24. Principles and design

Introduction

Biomechanical considerations

Principles of design

## 25. Mouth preparation

Introduction

Classification

## 26. Secondary impressions and master cast

Introduction

Anatomic impressions

Functional impressions

Master cast

## 27. Fabrication of removable partial denture

Introduction

Framework fabrication

Framework try-in

Record bases and occlusal rims

Jaw relations and articulation

Selection of teeth and denture base

Arrangement of artificial teeth and occlusion

Try-in

Waxing and processing the denture base

## 28. Denture insertion

Introduction

Objectives

Appointment

Insertion procedure

Instruction to patients

Postinsertion appointments

Postinsertion problems

## 29. Refitting and repair

Introduction

Refitting

Repair

## 30. Forms of removable partial dentures

Introduction

Temporary removable partial dentures

Immediate partial dentures

Variations of conventional cast partial dentures

Removable partial overdentures

Implant-supported removable partial dentures

Attachment-retained partial dentures

Miscellaneous

## **SECTION 3. Fixed Partial Dentures**

### 31. Introduction

Introduction

Definitions

Classification of fixed partial dentures

### 32. Component parts

Introduction

Retainer

Pontics

Connectors

### 33. Diagnosis and treatment planning

Introduction

History

Clinical examination

Diagnostic casts

Treatment planning

Mouth preparation

## 34. Occlusion

Introduction

Anatomy of TMJ

Centric relation

Mandibular movement and occlusal contact

Concepts of occlusion

Ideal occlusion

Occlusal interferences

Pathogenic occlusion

## 35. Tooth preparation

Introduction

Principles of tooth preparation

Armamentarium

Complete crowns (full) veneer crowns

Partial veneer crowns/partial-coverage restorations

## 36. Fluid control and gingival displacement

Introduction

Fluid control

Gingival displacement

## 37. Impression making

Introduction

Impression material

Impression trays

Impression techniques

Disinfection of impressions

Evaluation

### 38. Provisional restorations

Introduction

Ideal requirements of provisional restoration

Classification

Provisional restorative materials

Techniques of fabrication

Limitations of provisional restoration

Cementation

Removal of provisional restoration

### 39. Shade selection and lab communication

Introduction

Colour and light

Shade guides

Shade selection guidelines

Lab communication

## 40. Lab procedures

Introduction

Working cast and dies

Wax patterns

Spruing

Investing

Casting

Veneering

Soldering

## 41. Try-in and cementation

Introduction

Evaluation of prosthesis on cast

Try-in

Cementation

Cementation procedure for conventional restorations

Postcementation instructions

## 42. Failures in fixed partial dentures

Introduction

Classification

Methods of removing a failed FPD

## 43. Metal-free ceramic restorations

Introduction

History and development

Strengthening ceramics

Advantages

Disadvantages

Indications

Contraindications

Classification

Methods of fabrication

Fixed partial dentures

Clinical procedures

#### 44. Resin-bonded fixed partial dentures

Introduction

Indications and contraindications

Advantages and disadvantages

Classification

Fabrication

#### 45. Restoration of Endodontically Treated Teeth

Introduction

Post

Cores

Post crown

## **SECTION 4. Miscellaneous**

### **46. Ceramic laminate veneers**

Introduction

Definitions

History

Indications

Contraindications

Advantages and disadvantages

Shade selection

Tooth preparation

Soft tissue management

Impression procedure

Provisional restorations

Laboratory procedures

Cementation

Maintenance

Failures of laminate veneers

### **47. Attachment-retained dentures**

Introduction

Applications

Classification

Rationale of using attachments with removable partial dentures

## 48. Overdentures

Introduction

Requirements

Advantages

Disadvantages

Indications

Contraindications

Abutment selection

Types of tooth-supported overdentures

Immediate overdentures

## 49. Oral Implantology

Introduction

History and evolution

Classification

Implant-bone integration

Component parts of implant restoration

Implant treatment

Implant materials

## 50. Maxillofacial Prosthetics

Introduction

Classification of maxillofacial defects

Embryology

Maxillary defects

Hollow bulb obturator

Mandibular defects

Retention in maxillofacial prostheses

Benefits of the implant-retained prostheses

Treatment prosthesis

Extraoral prosthesis

Materials used in maxillofacial prosthesis

## 51. Smile Design

Introduction

Components of smile aesthetics

Proportion in smile design

Absolute and conversational aesthetics

## Appendices

## Suggested readings

## Index
