**K. Read the following text and answer the questions . ( 3 points )**

Every day of your life , you use a kind of computer – your brain. Your brain tells you when you  
are hungry . It helps you to move to work and to remember things .

Our brain can also solve difficult math problems . But when we want to solve more difficult ones  
, we usually use computers. They are really useful for saving a lot of information. They can keep  
words , pictures and sounds in their memory and give you the information you need in few seconds .  
Even the most advanced computers are often easy to use . You can play games with them too .

1. Where is the information kept in a computer ?
2. How long does it take to get information from a computer?
3. What does the word “ ones “ in last line refer to ? It refers to .....  
a. people                      b. problems                      c. computers                      d. pictures
4. Our brain works such as a computer .                      a. true                      b. false
5. Our brain solves math problems better than computers .                      a .true                      b. false

**GOOD LUCK .**
